KONDA SNEHA

CCNAv7 Academy | SOC Analyst L1 | B.Tech CSE

ASSOCIATE NETWORK ENGINEER | CCNA (v7) CERTIFIED

Phone: +91 8074768030 **Email:** snehakonda25@gmail.com **Location:** Hyderabad, Telangana (Open to Relocate)

LinkedIn: linkedin.com/in/snehakonda25

PROFESSIONAL SUMMARY

Detail-oriented and motivated **Network Engineer** and Computer Science graduate, certified in the complete 3-tier **Cisco CCNAv7 Curriculum** (Introduction to Networks; Switching, Routing & Wireless; Enterprise Networking, Security & Automation). Hands-on proficiency in designing, configuring, and troubleshooting enterprise network infrastructures using **Cisco Packet Tracer**. Solid technical expertise in **VLANs, Inter-VLAN Routing, OSPFv2, BGP fundamentals, TCP/IP, Standard/Extended ACLs, and NAT/PAT**. Certified **SOC Analyst (US-Council)** with strong foundational understanding of network defense, packet analysis using **Wireshark**, and remote access protocols (SSH/Telnet). Actively seeking an entry-level **L1 Network Support Engineer / NOC Analyst** role in Hyderabad/Telangana with 24/7 rotational shift flexibility.

CORE TECHNICAL SKILLS

Routing & Switching — Core Protocols

OSPFv2 (Single-Area) | BGP Fundamentals | Static & Default Routing | VLANs (802.1Q) | Inter-VLAN Routing (SVI / ROAS) | STP (Spanning Tree Protocol) | EtherChannel / LACP | Port Security

Protocols & Network Models — Suite & Addressing

TCP/IP Protocol Suite | OSI 7-Layer Model | IPv4 / IPv6 Subnetting (VLSM/CIDR) | DNS & DHCP Configuration | ARP / ICMP Troubleshooting | NAT / PAT | Telnet & SSH v2

Network Security & Operations — Defense & Monitoring

Access Control Lists (Std & Ext ACLs) | Wireshark Packet Analysis | NOC L1 Alert Triage | ServiceNow / Ticketing Basics | Incident Response & Log Analysis | MITRE ATT&CK Awareness | VPN Fundamentals (IPsec/SSL)

Tools, Systems & Languages — Software & Platforms

Cisco Packet Tracer | GNS3 Basics | Cisco IOS CLI | PuTTY / Terminal | Linux (Ubuntu / Kali) | Windows Server Basics | Python (Basic Scripting) | SQL & Git/GitHub

CERTIFICATIONS & CREDENTIALS

CCNAv7: Enterprise Networking, Security, and Automation (ENSA) — July 2024
Cisco Networking Academy
Competencies: Single-area OSPFv2, IPv4 Standard/Extended ACLs, NAT/PAT, Threat mitigation & network automation principles.

CCNAv7: Switching, Routing, and Wireless Essentials (SRWE) — April 2024
Cisco Networking Academy
Competencies: VLANs, Inter-VLAN routing (Layer 3 & ROAS), STP redundancy, EtherChannel, WLANs & static routing.

CCNAv7: Introduction to Networks (ITN) — Feb 2024
Cisco Networking Academy
Competencies: IPv4/IPv6 Addressing, VLSM Subnetting, Ethernet operations, switch/router access & end-to-end connectivity.

Certified Cybersecurity Associate – SOC Analyst (USC00016322) — Dec 2025
Cybereye / US-Council (Austin, TX, USA)
Credential in Security Operations Center L1 workflows, Alert Triage, Packet Inspection & Incident Escalation.

Cybersecurity Professional & SOC Associate | IBM Data Analytics — 2024 – 2025
Zetpeak (Ref: ZTR000048 / ZTR000843) & IBM SkillsBuild
Applied cybersecurity concepts, defensive monitoring, and enterprise data analytics fundamentals.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering — 2021 – 2025
Sree Chaitanya College of Engineering, Karimnagar (Affiliated to JNTUH)
CGPA: 7.0 / 10.0

Intermediate (MPC – Mathematics, Physics, Chemistry) — 2019 – 2021
Pingili Govt Girls Junior College, Hanamkonda
GPA: 5.9 / 10.0

Secondary School Certificate (SSC / 10th Standard) — Passed 2019
Zilla Parishad High School (ZPHS), Chityal
GPA: 9.2 / 10.0

HANDS-ON NETWORK ENGINEERING PROJECTS (CISCO PACKET TRACER)

1. Multi-Department Enterprise Campus Network Architecture Design

Simulation: Cisco Packet Tracer

`VLANs` `802.1Q Trunking` `Inter-VLAN (ROAS & SVI)` `OSPFv2` `ACLs` `Dynamic NAT/PAT` `Port Security`

- **Network Topology & Segmentation:** Architected a multi-tier enterprise network segmenting corporate traffic into dedicated VLANs (Management, Engineering, HR, Accounts, and Guest WiFi) across Cisco Catalyst 2960 switches.
- **Routing Implementation:** Configured **Single-Area OSPFv2 (Process ID 1, Area 0)** across core Cisco 2911 ISR routers with passive interfaces on LAN links to eliminate unnecessary routing advertisement overhead.
- **Inter-VLAN & Redundancy:** Deployed Router-on-a-Stick (sub-interfaces with 802.1Q encapsulation) and Layer-3 Switch Switched Virtual Interfaces (SVIs) enabling controlled cross-department communication; configured **Rapid Spanning Tree Protocol (RSTP)** to prevent layer-2 switching loops.
- **Security & Access Control:** Created and applied **Standard and Extended IPv4 ACLs** to restrict access to sensitive accounting and server subnets while permitting web/DNS traffic. Enabled **Port Security (Sticky MAC, max 2 hosts, shutdown violation)** on access ports to mitigate rogue access.
- **Edge Connectivity & Management:** Implemented **Dynamic PAT (Port Address Translation)** with overload pools to grant internal users outbound internet connectivity using a single public IP. Secured device remote access by enforcing **SSH v2** and disabling unencrypted Telnet.

2. Edge WAN Routing, BGP Multi-homing & Infrastructure Services Simulation

Simulation: Cisco Packet Tracer

`BGP Fundamentals` `Default Route Propagation` `DHCP Pools` `DNS Configuration` `Wireshark`

- **BGP & Edge Routing:** Simulated dual-ISP uplinks utilizing **External BGP (eBGP)** peering between Autonomous Systems (AS 65001 and AS 65002), injecting default routes to ensure dynamic path selection and WAN failover resilience.
- **Network Infrastructure Services:** Configured centralized **DHCP servers and IP Helper-Addresses** on default gateways to dynamically issue IP addresses, default gateways, and DNS server options to 150+ simulated workstations across multiple subnets.
- **Protocol Inspection & Troubleshooting:** Performed packet captures in Packet Tracer simulation mode and **Wireshark** to analyze TCP three-way handshake, ARP cache poisoning prevention, ICMP error codes, and DNS resolution latency.

3. Enterprise Security Monitoring & SOC Alert Triage Lab

Environment: Kali Linux & Wireshark

`Wireshark` `Nmap` `Log Analysis` `Incident Triage` `MITRE ATT&CK`

- Simulated reconnaissance attacks (SYN stealth scans, aggressive OS detection via Nmap) and captured pcap files in Wireshark to isolate abnormal TCP flag behaviors.
- Conducted log analysis and mapped detected threat activities to the **MITRE ATT&CK framework** to formulate Tier-1 incident mitigation and containment procedures.

NETWORK OPERATIONS & NOC READINESS

- **CLI Troubleshooting:** Proficient in `show ip route`, `show ip interface brief`, `show vlan brief`, `traceroute`, `ping`, `debug` commands for fast Layer 1-3 diagnostics.
- **24/7 Operations:** Willing and equipped to work in **24/7 rotational shifts** (including night shifts) for mission-critical NOC and IT infrastructure support.
- **Incident Ticket Handling:** Familiar with ITIL frameworks, SLA compliance, ticket lifecycle management, and clear escalation protocols.
- **Hardware Awareness:** Basic understanding of Ethernet cabling (Cat5e/Cat6, T568B), patch panels, SFP transceivers, and rack layout.

ACHIEVEMENTS & EXTRACURRICULAR

- **CM CUP Certificate of Participation (2025):** State Level & District Level Representation in Baseball.
- **Nehru Yuva Kendra (Govt. of India - 2023):** Active delegate at District Level Neighbourhood Youth Parliament Program.
- **Collegiate Sports Awards:** Certificate of Achievement in Volleyball (2023) & School Games Federation of Telangana District Level.
- **Technical Symposiums:** Participated in National Level Technical Fests & collaborative workshops on cloud and network security.

PROFESSIONAL DECLARATIONS & LOCATION DETAILS

Current Location: Boornapalli, Tekumatla, Jayashankar Bhupalpally, TG

Target Preferred Locations: Hyderabad / Secunderabad, Telangana & Andhra Pradesh

Notice Period: Immediate Joiner (0 Days)

Languages Known: English, Telugu, Hindi
